

İZBARÇO

BOWLINE

Form an eye in the rope with the standing part underneath. Run the free end up through the eye then take a turn around the standing part.

Feed the free end back down into the eye and hold there while pulling standing part to tighten down knot.

BUNTLINE HITCH

1. Pass end of rope through shackle, then back up across standing part. Make a turn around standing part, forming a loop with the shackle at base of loop.

2. Bring free end across tops of both parts of loop. Make a turn around standing part of loop, making sure free end exits between itself and the standing part of loop.

3. Pull knot tight down onto shackle.

ANCHOR BEND

Make two turns around the shackle, leaving turns open. Take a half turn around the standing line and feed the free end through the turns and pull tight.

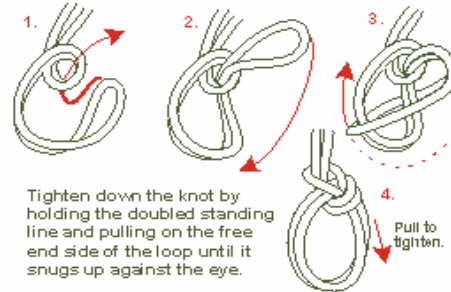

Now tie a half hitch around the standing part and pull tight. Seize the free end or tie a backup knot such as a double fisherman's with the free end around the standing part.

BOWLINE ON A BIGHT

Double a section of line and form an eye in the doubled line. Pass the free end up through the eye forming a double loop below the eye. Spread open the free end and pass it over the double loop and up past the eye, ending above the eye around the double standing line.

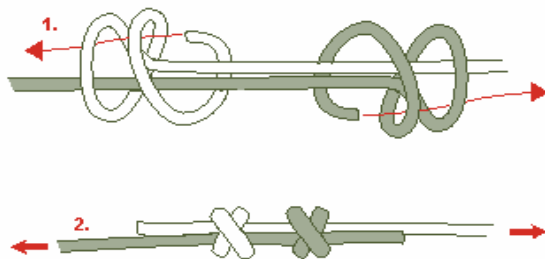

Tighten down the knot by holding the doubled standing line and pulling on the free end side of the loop until it snug up against the eye.
